Subject Index

Adhesion
oxide adhesion and growth characteristics on platinum-modified aluminide coatings, 69
Aluminium
hot corrosion behaviour of cast Co–22Cr–11Al alloy and Co–22Cr–11Al–0.3Y electron beam PVD coating on IN 738, 181
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
modelling the microstructural evolution and degradation of M–Cr–Al–Y coatings during high temperature oxidation, 19
oxide adhesion and growth characteristics on platinum-modified aluminide coatings, 69
role of diffusion zone structure in the hot corrosion of aluminide coating on nickel-based superalloys, 97
structure and hot corrosion behaviour of platinum-modified aluminide coatings, 111
the oxidation behaviour of CoCrAlY, CoCrAl and yttrium-implanted CoCrAl alloys compared and contrasted, 57
Aluminization
fundamental kinetic study of aluminization of iron by pack cementation at 900 °C, 41

Bending
degradation mechanisms of thermal barrier coatings in bending tests, 339

Carbon
friction and wear behaviour of chromium carbide coatings, 249
high temperature erosion behaviour of tungsten- and chromium-carbide-based coatings, 237
Ceramics
ceramic thermal barrier coatings with improved corrosion resistance, 389
hot corrosion studies of zirconia ceramics, 349
Chromium
friction and wear behaviour of chromium carbide coatings, 249
high temperature erosion behaviour of tungsten- and chromium-carbide-based coatings, 237
hot corrosion behaviour of cast Co–22Cr–11Al alloy and Co–22Cr–11Al–0.3Y electron beam PVD coating on IN 738, 181
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
modelling the microstructural evolution and degradation of M–Cr–Al–Y coatings during high temperature oxidation, 19
the oxidation behaviour of CoCrAlY, CoCrAl and yttrium-implanted CoCrAl alloys compared and contrasted, 57
Cobalt
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
the oxidation behaviour of CoCrAlY, CoCrAl and yttrium-implanted CoCrAl alloys compared and contrasted, 57
Corrosion
a new type of atomized coating powder for protection against wear and corrosion, 273
ceramic thermal barrier coatings with improved corrosion resistance, 389
comparative evaluation of high temperature coatings for corrosion protection of fuel injector tips, 153
high-temperature corrosion of LPPS-coated Inconel alloy MA 6000, 201
hot corrosion behaviour of cast Co–22Cr–11Al alloy and Co–22Cr–11Al–0.3Y electron beam PVD coating on IN 738, 181
hot corrosion studies of zirconia ceramics, 349

© Elsevier Sequoia/Printed in The Netherlands

role of diffusion zone structure in the hot corrosion of aluminide coatings on nickel-based superalloys, 97
structure and hot corrosion behaviour of platinum-modified aluminide coatings, 111
total corrosion control for industrial gas turbines: high temperature coatings and air, fuel and water management, 1

Diffusion
coatings with lenticular oxides preventing interdiffusion, 127
role of diffusion zone structure in the hot corrosion of aluminide coatings on nickel-based superalloys, 97

Electrodes
protection of graphite electrodes from oxidation, 141
Electron beam deposition
hot corrosion behaviour of cast Co–22Cr–11Al alloy and Co–22Cr–11Al–0.3Y electron beam PVD coating on IN 738, 181
Engines
a philosophy for thermal barrier coatings design and its corroboration by 10 000 h service experience on RB211 nozzle guide vanes, 359
Erosion
high temperature erosion behaviour of tungsten- and chromium-carbide-based coatings, 237
the mechanism of high temperature erosion of coated superalloys, 285

Friction
friction and wear behaviour of chromium carbide coatings, 249
Fuel injector tips
comparative evaluation of high temperature coatings for corrosion protection of fuel injector tips, 153

Graphite
protection of graphite electrodes from oxidation, 141
Growth
oxide adhesion and growth characteristics on platinum-modified aluminide coatings, 69

Iron
fundamental kinetic study of aluminization of iron by pack cementation at 900 °C, 41

Kinetics
fundamental kinetic study of aluminization of iron by pack cementation at 900 °C, 41

Lamellar structure
Monte Carlo simulation of the lamellar structure of thermally sprayed coatings, 261
Lasers
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
Life prediction
thermal barrier coating life prediction model, 305

Microstructure
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
modelling the microstructural evolution and degradation of M–Cr–Al–Y coatings during high temperature oxidation, 19
Monte Carlo simulation
Monte Carlo simulation of the lamellar structure of thermally sprayed coatings, 261

Nickel
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
role of diffusion zone structure in the hot corrosion of aluminide coating on nickel-based superalloys, 97

Oxidation
modelling the microstructural evolution and degradation of M–Cr–Al–Y coatings during high temperature oxidation, 19
protection of graphite electrodes from oxidation, 141
The oxidation behaviour of CoCrAlY, CoCrAl and yttrium-implanted CoCrAl alloys compared and contrasted, 57

Oxides
characterization and thermal shock testing of yttria-stabilized zirconia coatings, 327
coatings with lenticular oxides preventing interdiffusion, 127
hot corrosion studies of zirconia ceramics, 349
on deleterious effects of oxide particles proximate to free surfaces, 169
oxide adhesion and growth characteristics on platinum-modified aluminide coatings, 69
sintering studies of plasma-sprayed zirconia, 227
thermionically assisted r.f. plasma assisted physical vapour deposition of stabilized zirconia thermal barrier coatings, 377

Pack cementation
fundamental kinetic study of aluminization of iron by pack cementation at 900 °C, 41
Plasma deposition
thermionically assisted r.f. plasma assisted physical vapour deposition of stabilized zirconia thermal barrier coatings, 377
Plasma spraying
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
optimized vacuum plasma-sprayed titanium coatings, 215
sintering studies of plasma-sprayed zirconia, 227
Platinum
oxide adhesion and growth characteristics on platinum-modified aluminide coatings, 69
structure and hot corrosion behaviour of platinum-modified aluminide coatings, 111
Powder
a new type of atomized coating powder for protection against wear and corrosion, 273

Sintering
sintering studies of plasma-sprayed zirconia, 227
Stress
finite element thermal stress solutions for thermal barrier coatings, 307
Superalloys
role of diffusion zone structure in the hot corrosion of aluminide coatings on nickel-based superalloys, 97
the mechanism of high temperature erosion of coated superalloys, 285
Surfaces
on deleterious effects of oxide particles proximate to free surfaces, 169

Tantalum
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
Thermal barrier coatings
a philosophy for thermal barrier coatings design and its corroboration by 100 000 h service experience on RB211 nozzle guide vanes, 359
ceramic thermal barrier coatings with improved corrosion resistance, 389
degradation mechanisms of thermal barrier coatings in bending tests, 339
thermal barrier coating life prediction model, 305
thermionically assisted r.f. plasma assisted physical vapour deposition of stabilized zirconia thermal barrier coatings, 377
Thermal shock
characterization and thermal shock testing of yttria-stabilized zirconia coatings, 327
Thermal spraying
Monte Carlo simulation of the lamellar structure of thermally sprayed coatings, 261
Titanium
optimized vacuum plasma-sprayed titanium coatings, 215
Tungsten
high temperature erosion behaviour of tungsten- and chromium-carbide-based coatings, 237
Turbines
total corrosion control for industrial gas turbines: high temperature coatings and air, fuel and water management, 1

Wear
friction and wear behaviour of chromium carbide coatings, 249

Yttrium
characterization and thermal shock testing of yttria-stabilized zirconia coatings, 327
hot corrosion behaviour of cast Co–22Cr–11Al alloy and Co–22Cr–11Al–0.3Y electron beam PVD coating on IN 738, 181
laser-induced microstructural modifications in a vacuum plasma sprayed NiCoCrAlYTa coating, 85
modelling the microstructural evolution and degradation of M–Cr–Al–Y coatings during high temperature oxidation, 19
the oxidation behaviour of CoCrAlY, CoCrAl and yttrium-implanted CoCrAl alloys compared and contrasted, 57

Zirconium
characterization and thermal shock testing of yttria-stabilized zirconia coatings, 327
hot corrosion studies of zirconia ceramics, 349
sintering studies of plasma-sprayed zirconia, 227
thermionically assisted r.f. plasma assisted physical vapour deposition of stabilized zirconia thermal barrier coatings, 377
